ABOUT US

Who We Are

EBMAC is a prestigious platform offering internationally accredited programs in Business Management, including **Diploma, Degree, Master's, DBA, and PhD (Doctoral) programs**.

We are a **European-based international academic institution** specializing in business, management, and executive education. Our mission is to empower professionals worldwide with **career-driven qualifications** aligned with real global business needs.

EBMAC is an **accredited, recognized, and affiliated college**, established in Central Europe by a group of distinguished leaders in business management education. We are a member of global educational alliances and accrediting agencies and are affiliated with partnered universities, educational councils, and quality bodies including **EIEAS, BIHEB, ITQSM, BQS, WAC, and AAQA**.

EBMAC is recognized as a higher education institution that has undergone rigorous quality review by national and international independent agencies, confirming compliance with established academic standards. This ensures quality assurance and enhances the value of qualifications for further education, employment, and career progression. Accreditation may be **regional (broader scope)** or **national (often career-focused)** and is recognized by the respective country's Department or Ministry of Education.

Accreditation reflects a commitment to quality in academics, faculty, educational management, and operations, and is crucial for academic credibility, professional recognition, and career prospects. While accreditation in many countries is administered by government authorities, in today's global academic environment, **international colleges and universities actively engage with reputable global accreditation providers** to ensure international relevance and recognition.

European Business Education for the Global Professional

Internationally accredited business and management programs designed for today's professionals, executives, and entrepreneurs.

We deliver **career-focused business education** aligned with global industry standards. Our programs prepare students for leadership in international markets through **practical training, strategic thinking, and applied management expertise**.

At the **EBMAC European Academia platform**, students may earn accredited business management qualifications at **Bachelor's, Master's, and Doctoral levels**. Learners choose programs based on their career objectives, available time, and financial resources. EBMAC provides dedicated academic support officers and qualified faculty to guide students throughout their academic journey.

Key Highlights

- Internationally Accredited Programs
- Global Faculty & Professional Trainers
- Online & Hybrid Learning

The Future of Business Education in Europe & Globally

The landscape of business education in Europe is undergoing a transformative shift. As we move into **2026–2030 and beyond**, technological innovation, evolving workforce demands, and global socio- economic changes are reshaping how business schools operate and how students learn.

European business education is rapidly transitioning from theory-heavy instruction to **immersive, personalized, and real-world learning experiences**. Students must adapt by becoming **lifelong learners** who are digitally skilled, critical thinkers, communicative, innovative, globally minded, and action-oriented.

Developing strong management capabilities is essential for leaders operating in today's dynamic global workplace. While new challenges continue to emerge, they also bring opportunities. Addressing these effectively requires sharpening business management skills and aligning professional goals within teams and organizations.

Our Vision

To be a leading European platform for internationally recognized business education, professional leadership training, and executive development.

Our Mission

- Deliver globally relevant business education
- Build leadership for international markets
- Expand access to quality professional learning
- Support lifelong career development

Core Values

The core values of **EBMAC** support our mission and vision within our European and global alliance:

- **Student-Focused** – We care for learners from Europe and across the world.
- **European Identity** – We deliver high-quality education while upholding European academic values.
- **Intercultural & Multicultural** – We provide multicultural education through English-language instruction and curriculum.
- **Passion for Excellence** – A strong commitment to high performance, continuous improvement, and outstanding results.
- **Social Responsibility** – Accountability, transparency, ethical behavior, fairness, and respect for human rights and the environment.
- **Inclusivity** – Learning opportunities that enable all students to reach their full potential, regardless of background or ability.
- **Sustainability** – Commitment to environmental stewardship, social justice, resilience, and intergenerational equity.
- **Innovation** – We advance education through forward-thinking and innovation.
- **Transparency** – Open communication, accountability, and clarity in decision-making to build trust.
- **Collaboration** – Educators across EU and global member states collaborate in teaching, best practices, professional development, and academic governance.

LEADERSHIP

Executive Governance

EBMAC is led by internationally experienced academic and professional leaders overseeing global strategy, curriculum development, admissions growth, and international training operations.

Leadership Responsibilities

- International academic strategy
- Global admissions and recruitment
- Professional and executive training
- International institutional partnerships
- Accreditation and compliance development

ACCREDITATION & RECOGNITION

Institutional Standing

EBMAC operates under internationally recognized academic quality frameworks supported by independent national and international accreditation and quality assurance bodies.

What Accreditation Means

Accreditation confirms that an institution:

- Meets established academic standards
- Maintains quality governance and assessment
- Delivers credible qualifications
- Supports international academic mobility
- Holds professional and employer recognition value

For latest Accreditation Info.: https://www.ebmac.org/accreditation/

Global Recognition

Our qualifications support international academic progression, professional relevance, and global career mobility.

International Partnerships

We collaborate with:

- International universities
- Training institutes
- Accreditation bodies
- Professional councils
- Government and private institutions

These partnerships support:

- Dual certifications
- Joint training programs
- Faculty exchange
- Global student mobility

For Latest International Partnership Info : https://www.ebmac.org/international-partnerships/

EBMAC Partnerships and Reciprocal Accreditation Scope: EBMAC officially welcomes nationally accredited and recognized government and private educational institutions, accrediting agencies, universities, colleges, and professional or chartered institutions worldwide.

EU-UK Qualification Frameworks

As a European Institution, EBMAC officially follows the European Qualification Framework (EQF) , UK Regulatory Qualifications Framework – RQF, and MQF – Malta Qualifications Framework:

The Malta Qualifications Framework (MQF) is a system for categorizing qualifications in Malta based on learning outcomes like knowledge, skills, and competencies. It aims to make Maltese qualifications transparent and comparable to those in other countries by referencing the European Qualifications Framework (EQF). There are eight MQF levels, ranging from Level 1 (school-leaving certificate) to Level 8 (doctorate), which include both academic and vocational qualifications.

MQF

MQF Levels

MQF Level	Examples of qualification types at a specific MQF level (The list in this column is not exhaustive)	Number of ECTS*
8	Doctoral Programmes: PhD Professional Doctorate	N/A
		180
7	Master's Degree Post-graduate Diploma Post-graduate Certificate	90

2	Foundation Certificate MATSEC Secondary Education Certificate VET Level 2	60
		N/A
		60
1	Introductory Certificate VET Level 1	40
		40

* Programmes assigned fewer ECTS than indicated will be classified as Awards.

United Kingdom (UK) Regulated **Qualifications Framework (RQF)**

The Qualifications and Credit Framework (QCF) was in operation between 2008 and 2015. Since 2015, the Regulated Qualifications Framework (RQF) replaced the Qualifications and Credit Framework and is in use in England, Wales and Northern Ireland.

The RQF framework has nine levels from Entry Level through to Level 8, with Level 8 being the highest. The level of a qualification shows how difficult the learning is.

Qualifications that share the same level:

- are broadly similar in terms of the demand
- can be very different in terms of content, duration and assessment method.

For example, GCE A levels are at level 3 on the RQF, as are BTEC Level 3 National qualifications and the Level 3 Extended Project qualification. The level of the qualification is stated in the qualification title to ensure it's really clear for users of the qualification.

How is the size of the qualification determined?

Qualifications on the RQF have their size expressed in terms of Total Qualification Time (TQT) and, where appropriate, Guided Learning (GL) and credit.

TQT is, essentially, the total number of hours a learner is expected to take to complete the qualification to the required standard. It includes:

- Guided Learning, where a learner is being taught by a tutor or is otherwise participating in training under the immediate guidance or supervision of a tutor. This includes assessment activity undertaken under the immediate guidance or supervision of a tutor/assessor
- an estimate of the number of hours a learner will reasonably be likely to spend in preparation, study or other form of participation in training, including assessment, that is not under the immediate guidance or supervision of a tutor.

How do RQF levels compare with other qualification frameworks?

The RQF consists of 8 primary levels, along with 3 additional entry levels. Here is a table that compares these RQF levels to their corresponding certificates:

RQF	SCQF
Entry Level 1	Level 1
Entry Level 2	Level 2
Entry Level 3	Level 3
Level 1	Level 4
Level 2	Level 5
Level 3	Level 6
Level 4/5	Level 7/8
Level 6	Level 9/10
Level 7	Level 11
Level 8	Level 12

The European Qualifications Framework (EQF):

The EU developed the **European Qualifications Framework (EQF)** as a translation tool to make national qualifications easier to understand and more comparable. The EQF seeks to support

cross-border mobility of learners and workers, promote lifelong learning and professional development across Europe.

The EQF is an 8-level, learning outcomes-based framework for all types of qualifications that serves as a translation tool between different national qualifications frameworks. This framework helps improve transparency, comparability and portability of people's qualifications and makes it possible to compare qualifications from different countries and institutions.

Regarding the EQF 8 Levels, for a better knowledge and clear understanding you may visit this link: https://europass.europa.eu/en/description-eight-eqf-levels

EQF, where The learning outcomes are defined in terms of:

Knowledge: in the context of EQF, knowledge is described as theoretical and/or factual.

Skills: In the context of EQF, skills are described as cognitive (involving the use of logical, intuitive and creative thinking) and practical (involving manual dexterity and the use of methods, materials, tools and instruments).

Responsibility and autonomy: In the context of the EQF responsibility and autonomy is described as the ability of the learner to apply knowledge and skills autonomously and with responsibility.

The EQF covers all types and all levels of qualifications and the use of learning outcomes makes it clear what a person knows, understands and is able to do. The level increases according to the level of proficiency, level 1 is the lowest and 8 the highest level. Most importantly the EQF is closely linked to national qualifications frameworks, this way it can provide a comprehensive map of all types and levels of qualifications in Europe, which are increasingly accessible through qualification databases.

The EQF was set up in 2008 and later revised in 2017. Its revision has kept the core objectives of creating transparency and mutual trust in the landscape of qualifications in Europe. Member States committed themselves to further develop the EQF and make it more effective in facilitating the understanding of national, international and third-country qualifications by employers, workers and learners.

The EQF works together with other European and international instruments supporting the recognition of qualifications.

- The Council Recommendation of 26 November 2018 on promoting automatic mutual recognition of higher education and upper secondary education and training qualifications and the outcomes of learning periods abroad refers to the EQF as a way to foster transparency and build trust between national education and training systems
- Directive 2005/36/EC addresses the recognition of professional qualifications in the EU, enabling professionals to move across borders and practise their occupation or provide services abroad
- The Lisbon recognition convention is an international agreement administered by UNESCO and the Council of Europe that allows for the recognition of academic qualifications in Europe and beyond;
- The EQF is compatible with the Qualifications Framework for the European Higher Education Area and its cycle descriptors. The framework was agreed by education ministers of the intergovernmental Bologna Process in 2005.
